

# SP3NW

## Startup Company Incubation

Washington State University's business incubator, SP3NW, supports the advancement of technological solutions by connecting entrepreneurs and innovators to funding sources, industry mentors, academia, and the community.

Located in the University District of Spokane, Washington, SP3NW officially launched in December 2020 to build and support a flexible infrastructure for resilient entrepreneurship that identifies, grows, and deploys emerging innovations.

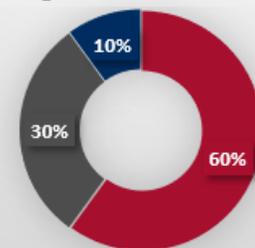

Today, the membership-based incubator provides wraparound support through business incubation services to startup companies developing scalable technologies regardless of academic or industry affiliation.

WSU's SP3NW is funded in part by the:

### Economic Development Activities

- Advancing High-Growth Entrepreneurship
- Regional Commercialization Efforts
- Cultivating Innovation
